

Hi-Tech Ultimate Roman Shade

Winner of the "Most Innovative Overall Design"

The Window Covering Manufacturing Association (WCMA) was organized in the 1950's to represent the interests of the window covering industry. For the past five years they have recognized manufactures and their engineering, design and marketing teams for their outstanding contributions to the window covering industry. This year's products were selected for their technical innovations and enhancements, style concepts and overall design.

Here at DSC Window Fashions, we're proud to announce that our new Hi-Tech Ultimate Roman Shade was recognized by the WCMA as the 2010 winner of the "Most Innovative Overall Design" in the category of Health and Environmental Safety. We're proud to have been selected for this prestigious award.

The "Ultimate" Roman Shade Solution

Our newly patented and patents pending Hi-Tech Ultimate Roman Shade offers customers an array of advantages over any other Roman shade in today's window covering industry. Its energy efficiency and unlimited custom decorating beauty offers customers the "ultimate" safe Roman shade solution.

The unique cellular properties are not only energy efficient, allowing for a 62% reduction in heat and cold transfer but also aid to prevent strangulation through reducing the amount of cord exposure. Additional features such as the operating cord break-away tassel or guided universal cord tensioner are available for added safety.

Product Feature and Specifications

Choose from our current fabric selections or send in your own material to create a custom beautiful and unique Roman Shade. Customer's own materials are always welcomed, you fabric choices are unlimited. Four and a half inch valances are standard and outside mount valances have wrapped returns to create a polished look.

Enhance the beauty of the shade with contrasting valances or add trim and banding. Add blackout or sateen lining to the face fabric for privacy or room darkening enhancements. Our new SheerVue feature adds a cellular shade under the hem of the Ultimate shade to give customer's complete light control.
